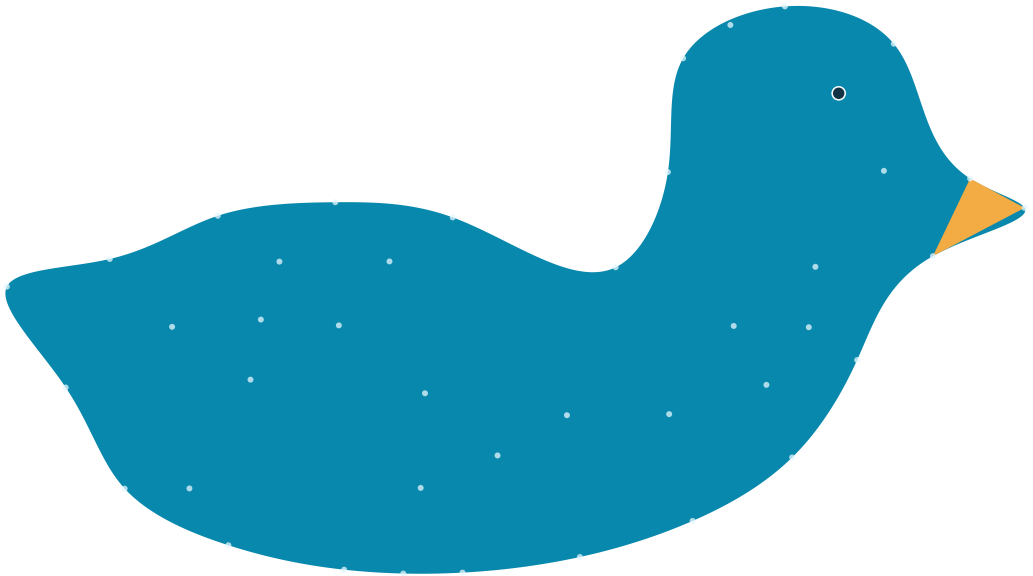
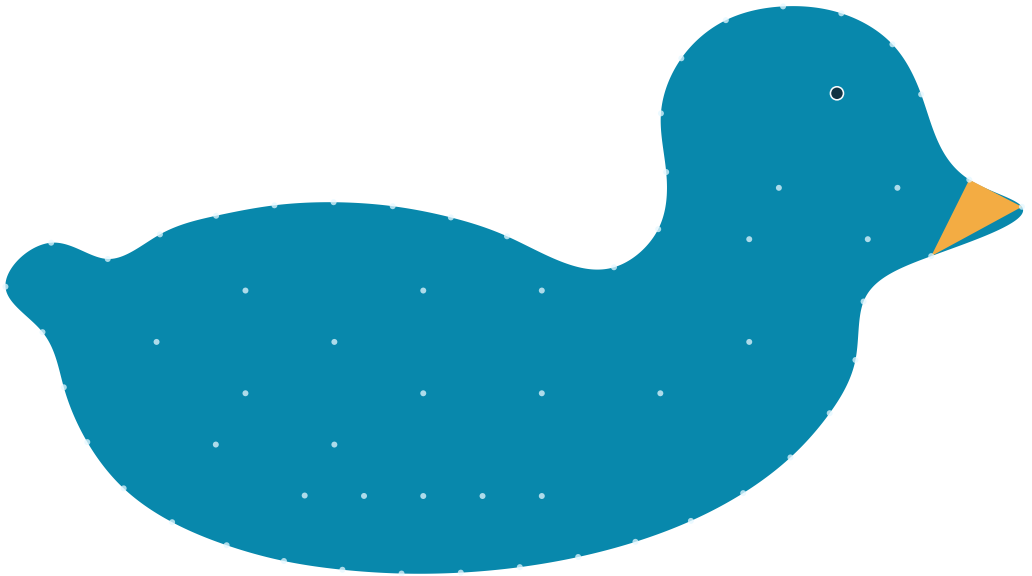
Duck formation from simulated particle trajectories

Six fixed release sites
42 simulated particles · geometric IoU 96.8%



Max position error 0.00065 | Minimum separation 0.0262

Independent wall-release positions
64 simulated particles · geometric IoU 98.9%



Max position error 0.00035 | Minimum separation 0.0263

Filled silhouettes reconstruct simulated boundary landmarks; particles at their physical diameter are shown separately.
